How the CLAT PG Exam Pattern Changed Over 10 Years

The older papers look very different from the current one, and knowing this helps you choose how to use each paper.

The 2017 and 2018 papers carried 150 objective questions each, and the 2017 paper ran for 2 hours with a 0.25 mark deduction for every wrong answer. The 2019 paper split into Part A with 100 objective questions and Part B with a 50 mark subjective section. From 2020 onward, the exam moved to 120 multiple choice questions built around comprehension passages, which is the format you will face now. The current paper runs for 2 hours, awards one mark per question, and deducts 0.25 marks for each wrong answer.

How to Use All 10 CLAT PG Previous Year Papers Effectively

Start with the five most recent papers, from 2022 to 2026, because they match the current format and timing. Solve each one in a single 2 hour sitting, without breaks, and mark every question you guessed on before you check the answer key.

Use the older papers from 2017 to 2021 differently. Treat them as subject practice rather than full mock tests, and pick out the questions on Constitutional Law, Jurisprudence, Contract, Torts, and Criminal Law to strengthen your core concepts. Analysts who reviewed the 2025 paper noted that it leaned on minor acts such as the Transfer of Property Act, labour law, taxation, and administrative law, so make sure your revision does not stop at the big subjects.

After every paper, write down three things: your score, your accuracy rate on attempted questions, and the topics behind your wrong answers. A week later, re-attempt only the questions you got wrong. This simple loop turns ten papers into a personal revision plan.
