Definition of Nuisance under Tort Law

Nuisance under tort law refers to an act that unlawfully interferes with an individual's use and enjoyment of their property. It is divided into two main categories: public nuisance and private nuisance.

Types of Nuisance

Public Nuisance:

A public nuisance affects the community or the public at large. It is an act or omission that materially affects the reasonable comfort and convenience of a significant number of people. Public nuisance is typically dealt with by governmental authorities rather than individual plaintiffs.

Examples: Obstructing a public roadway, polluting a river, or conducting noisy activities that affect an entire neighborhood.

Private Nuisance:

A private nuisance is an interference with the use and enjoyment of land that affects an individual or a small group of individuals. This type of nuisance is typically brought by the affected property owners.

Examples: Excessive noise, foul odors, or pollution emanating from a neighboring property.

Elements of Private Nuisance

1. **Interference:** There must be an interference with the plaintiff's use or enjoyment of land. This interference can be physical (e.g., flooding, pollution) or non-physical (e.g., noise, odors).

2. **Unreasonableness:** The interference must be substantial and unreasonable. Courts consider factors such as the duration, intensity, and nature of the interference. Minor inconveniences or petty annoyances do not constitute a nuisance.
3. **Damage:** The plaintiff must show actual damage or harm resulting from the interference. This can include physical damage to property, loss of comfort, or health impacts.

Defences to Nuisance

1. **Prescription:** If the nuisance has been ongoing for a certain period (commonly 20 years), the defendant may acquire a legal right to continue the activity, known as an easement by prescription.
2. **Statutory Authority:** If the defendant's conduct is authorized by legislation, it may not be considered a nuisance. For instance, certain industrial activities might be permitted by environmental regulations.
3. **Consent:** If the plaintiff has consented to the interference, this can serve as a defense. However, consent must be informed and voluntary.
4. **Contributory Negligence:** If the plaintiff has contributed to the nuisance or exacerbated the situation through their own actions, this can reduce or eliminate the defendant's liability.

Remedies for Nuisance

1. **Damages:** The primary remedy in nuisance cases is monetary compensation for the harm suffered. This can cover property damage, loss of enjoyment, and any consequential losses.
2. **Injunctions:** Courts can issue an injunction to prevent the defendant from continuing the nuisance. Injunctions can be temporary or permanent and may require the defendant to cease specific activities or take corrective actions.
3. **Abatement:** In some cases, the plaintiff may take direct action to stop the nuisance, such as removing an obstruction. However, this remedy is subject to legal restrictions and must be carried out lawfully.

Cases on Nuisance under Tort Law

Sturges v. Bridgman: This case established the principle that the character of the locality is relevant in determining whether an activity constitutes a nuisance. It involved a confectioner

whose noisy machinery interfered with a doctor's practice.

Rylands v. Fletcher: Although this is primarily a case on strict liability, it is often discussed in the context of nuisance law. It established that a person who brings something onto their land that is likely to cause harm if it escapes is strictly liable for any resulting damage.
