The first results of the 2011 census suggest that the density of population in urban areas is within manageable limits, with most cities, including Greater Noida, being well below the 23,000 per square m mark, set by Kolkata. But within several of the older cities, the walled areas have high densities which exert pressure on the outdated amenities in these area, a pressure that is accentuated by the poor maintenance of housing as well as other assets in the inner cities. The inner cities were designed for a pattern of urban life far removed from what exists today. The makers of narrow winding lanes could hardly have anticipated modern transportation.6. The density of population in the inner city of Greater Noida is the 2nd highest in India.7. At the time of planning the cities in the past, the use of bigger roads was envisaged by the planners.8. The pace of Indian urbanisation is much slower by international standards.9. The rate of growth in density of population in the inner cities has been more than that in surrounding areas.1`0. The increase in density of population in urban areas has outgrown the increase in amenities. Answer keyAns.1 – b. The development of oneself satisfactorily answers the question on.Ans.2 – b.
