Answers:

1. Correct Answer: C – Possesses unlimited internal and external authority subject to the Constitution

Explanation – The term “Sovereign” signifies that India is independent of any external control and that internally, all authority flows from the Constitution. Unlike the British system of parliamentary sovereignty, India adopts constitutional sovereignty—meaning even Parliament is subordinate to the Constitution. Sovereignty here is therefore not absolute; it is structured and limited by constitutional norms, rights, and values.

1. Correct Answer: B – The Cabinet Mission Plan

Explanation – The Constituent Assembly was constituted under the Cabinet Mission Plan of 1946, which provided the framework for Indian self-governance. Initially a body created under colonial authority, it later assumed sovereign character after Independence. Its legitimacy thus evolved—from imperial arrangement to an embodiment of the will of the people.

1. Correct Answer: C – All organs are bound by constitutional limits

Explanation – Constitutional supremacy ensures that no organ—legislature, executive, or judiciary—operates beyond constitutional boundaries. Unlike parliamentary supremacy in the UK, Indian constitutionalism subordinates all power to the Constitution. This allows courts to invalidate laws and executive actions that violate constitutional provisions.

1. Correct Answer: C – It seeks to restructure social and political relations

Explanation – The Constitution is not merely procedural; it is transformative. Through Fundamental Rights, Directive Principles, and affirmative action, it aims to dismantle entrenched hierarchies of caste, class, and gender. It does not simply preserve the status quo—it seeks to reimagine society on egalitarian lines.

1. Correct Answer: B – Insert ideological commitments explicitly

Explanation – The 42nd Amendment inserted “Socialist” and “Secular” into the Preamble. These values were implicit earlier, but the amendment made them explicit, reflecting a constitutional commitment to social justice and religious neutrality. It shows that the Preamble can evolve while retaining its core identity.

1. Correct Answer: B – Its meaning evolves with social change

Explanation – A “living Constitution” does not change in text but in meaning through interpretation. Courts adapt constitutional principles to contemporary realities—such as expanding Article 21 to include privacy, dignity, and environment—ensuring relevance without formal amendment.

1. Correct Answer: C – Different units enjoy different constitutional arrangements

Explanation – Indian federalism is asymmetric because some regions have special constitutional treatment (e.g., Nagaland, earlier J&K, Sixth Schedule areas). This reflects India’s diversity and the need for flexible federal design, distinguishing it from uniform federal models like the USA.

1. Correct Answer: C – Partition and internal instability

Explanation – The trauma of Partition, communal violence, and fears of secession shaped the framers’ insistence on strong emergency powers. These provisions were designed to preserve unity and constitutional order during extraordinary threats.

1. Correct Answer: B – Social cohesion across divisions

Explanation – Fraternity is not mere national unity; it is a constitutional aspiration to foster social solidarity across caste, religion, and class. It underpins equality and dignity by recognising that democracy cannot survive in a fragmented society.

1. Correct Answer: C – A key to constitutional interpretation

Explanation – The Preamble is not a source of power, but it acts as an interpretative compass. Courts use it to understand the spirit and objectives of the Constitution, especially in cases involving ambiguity or fundamental values.

1. Correct Answer: C – Substantive guarantees of justice and dignity

Explanation – India goes beyond procedural democracy. It embeds commitments to social and economic justice, dignity, and equality, transforming democracy into a substantive project rather than a mere electoral mechanism.

1. Correct Answer: C – An instrument of social transformation

Explanation – Constituent Assembly debates reveal that the framers viewed the Constitution as a tool for rebuilding society after colonialism. They consciously rejected minimalism in favour of a document capable of guiding deep social change.

1. Correct Answer: C – Encompasses social, economic, and political dimensions

Explanation – Justice in the Preamble is holistic. It extends beyond courts to social conditions (ending exploitation), economic arrangements (reducing inequality), and political participation (democratic inclusion).

1. Correct Answer: C – Desire to prevent administrative arbitrariness

Explanation – The Constitution’s detail reflects anxiety about unchecked executive power inherited from colonial rule. Codifying procedures, rights, and limitations was intended to prevent arbitrary governance.

1. Correct Answer: B – Ethical governance beyond formal legality

Explanation – Constitutional morality requires institutions to act in the spirit of constitutional values—liberty, equality, dignity—even when formal rules allow discretion. It restrains power through ethical commitment, not just legal compliance.

1. Correct Answer: B – “Democratic Republic”

Explanation – This phrase represents a complete rupture from monarchy and colonial subordination. It affirms that authority flows from the people and that governance is based on popular will.

1. Correct Answer: B – Executive discretion

Explanation – Written guarantees reveal distrust of unchecked power, especially executive authority. They ensure that individual liberty is protected through enforceable legal norms.

1. Correct Answer: C – Kesavananda Bharati v. State of Kerala

Explanation – This case recognised the Preamble as part of the Constitution and treated it as embodying its basic structure. It transformed the Preamble from a symbolic introduction into a doctrinal anchor of constitutional identity.

1. Correct Answer: C – Fundamental in governance but non-justiciable

Explanation – The Directive Principles are placed in Part IV to guide the State in law-making and policy. Article 37 makes their position clear: they are “fundamental in the governance of the country” but “shall not be enforceable by any court.” This reflects the Constitution’s vision of a welfare State—DPSPs supply moral and political direction, while courts ensure that they are pursued through democratic means rather than judicial compulsion.

1. Correct Answer: B – Minerva Mills v. Union of India

Explanation – In Minerva Mills, the Court rejected the idea that Fundamental Rights and DPSPs are in conflict. It held that Parts III and IV are “like two wheels of a chariot”—neither can be given absolute primacy. This decision constitutionalised harmony between liberty and social justice as part of the basic structure.

1. Correct Answer: C – Access to justice

Explanation – Article 39A is not about economic policy alone; it constitutionalises equal justice. It mandates free legal aid and removal of barriers to courts. This provision inspired the Legal Services Authorities Act and Lok Adalats, transforming access to justice from a privilege into a constitutional commitment.

1. Correct Answer: B – Balance rights with responsibilities

Explanation – The Fundamental Duties were inserted to correct the perception that the Constitution spoke only of entitlements. They embed civic ethics into constitutional culture,

reminding citizens that democracy depends not merely on claiming rights, but on discharging social responsibilities.

1. Correct Answer: C – Guide interpretation of Fundamental Rights

Explanation – In AIIMS Students’ Union, the Court clarified that Fundamental Duties, though non-enforceable, can shape the content of rights. For example, freedom of speech may be balanced with the duty to preserve harmony or protect public property.

1. Correct Answer: C – Altered the Preamble and federal balance

Explanation – The 42nd Amendment changed the ideological identity of the Constitution by inserting “Socialist” and “Secular” into the Preamble. It also centralised power by curtailing judicial review and expanding Parliament’s authority—hence its reputation as a “mini-Constitution.”

1. Correct Answer: C – Made Article 21 non-suspendable

Explanation – The 44th Amendment was a constitutional repentance for ADM Jabalpur. By making Articles 20 and 21 immune even during Emergency, it restored the inviolability of life and liberty, placing them beyond executive suspension.

1. Correct Answer: C – Constitutional entrenchment of local self-government

Explanation – The 73rd and 74th Amendments did not merely decentralise administration; they constitutionalised grassroots democracy. Panchayats and Municipalities became institutions of self-government, not creations of ordinary statute.

1. Correct Answer: A – Introducing cooperative federalism

Explanation – GST did not abolish federalism; it reshaped it. The GST Council institutionalises Centre-State cooperation in taxation, replacing competitive federalism with a coordinated fiscal structure.

1. Correct Answer: C – Economic disadvantage can be an independent basis

Explanation – In Janhit Abhiyan, the Court held that poverty is a constitutionally relevant axis of disadvantage. This marked a doctrinal shift by recognising that backwardness need not always be social or caste-based.

1. Correct Answer: B – Enables direct enforcement of rights

Explanation – Article 32 is itself a Fundamental Right. It empowers citizens to approach the Supreme Court directly for enforcement. Dr. Ambedkar described it as the “heart and soul” because rights without remedies are illusory.

1. Correct Answer: C – Secure release from unlawful detention

Explanation – Habeas Corpus protects personal liberty at its most basic level. It commands the authority to justify detention, making liberty the rule and detention the exception.

1. Correct Answer: C – Article 226 extends to non-FR matters

Explanation – Article 226 empowers High Courts to issue writs not only for Fundamental Rights but “for any other purpose,” making their jurisdiction broader and more flexible than Article 32.

1. Correct Answer: B – Exhaustion of statutory remedies

Explanation – This doctrine reflects judicial restraint. Courts insist that where the legislature provides a complete remedial framework, it must ordinarily be used first. Yet, it is not absolute—writs still lie for violation of natural justice or lack of jurisdiction.

1. Correct Answer: B – Emergency executive function

Explanation – Ordinance power exists to meet urgent situations when Parliament is not in session. It is not an alternative legislature, but a temporary bridge between necessity and parliamentary authority.

1. Correct Answer: D – Not approved within six weeks

Explanation – An ordinance must be laid before Parliament and approved within six weeks of reassembly. Otherwise, it lapses automatically, preserving legislative supremacy.

1. Correct Answer: B – Re-promulgation as fraud on the Constitution

Explanation – In D.C. Wadhwa, the Court held that repeated re-promulgation subverts parliamentary democracy. Ordinances are meant for emergencies, not as tools of permanent governance.

1. Correct Answer: B – That life and liberty can be suspended during Emergency

Explanation: In ADM Jabalpur v. Shivkant Shukla (1976), the Supreme Court held that during a Proclamation of Emergency, even the right to life under Article 21 could be suspended. This meant that an individual could not approach courts even for illegal detention. The Forty-Fourth

Constitutional Amendment (1978) decisively reversed this position by making Articles 20 and 21 non-suspendable even during an Emergency. The amendment constitutionalised the lesson of ADM Jabalpur—that certain core rights must remain inviolable even in times of crisis.

1. Correct Answer: A – Prison conditions and humane treatment

Explanation: Francis Coralie Mullin v. Administrator, Union Territory of Delhi (1981) expanded Article 21 beyond mere animal existence. The Court held that the “right to life” includes the right to live with human dignity, encompassing nutrition, clothing, shelter, and humane treatment. The case arose in the context of prison conditions and restrictions on a detainee’s meeting rights. It laid the foundation for a substantive, socio-economic interpretation of Article 21.

1. Correct Answer: B – E.P. Royappa

Explanation: In E.P. Royappa v. State of Tamil Nadu (1974), the Supreme Court revolutionised equality jurisprudence by declaring that “equality is antithetic to arbitrariness.” This shifted Article 14 from a formal classification-based test to a substantive guarantee against arbitrary State action. Later cases like Maneka Gandhi built upon this, but Royappa introduced the core doctrine.

1. Correct Answer: B – Property became a legal right under Article 300A

Explanation: The Forty-Fourth Amendment removed the Right to Property from Part III by repealing Article 31. However, it did not eliminate constitutional protection altogether. Instead, it inserted Article 300A, recognising property as a constitutional (but not fundamental) right. This balanced individual protection with the State’s power to implement socio-economic reforms.

1. Correct Answer: B – Economic disadvantage can stand alone as a basis

Explanation: In Janhit Abhiyan v. Union of India, the Supreme Court upheld the 103rd Constitutional Amendment introducing EWS reservation. The majority held that economic criteria can independently justify affirmative action. This marked a doctrinal shift from the traditional caste-centric understanding of backwardness and confirmed that equality under Article 14 permits economic disadvantage as a standalone basis.

1. Correct Answer: D – Public order, morality, and health

Explanation: Article 25 guarantees freedom of conscience and religion but expressly subjects it to public order, morality, and health. This ensures that religious freedom does not override societal

interests. Courts have repeatedly upheld regulations on religious practices when they conflict with these constitutional limitations.

1. Correct Answer: B – Judicial interpretation of free speech

Explanation: The Constitution does not explicitly protect journalists' sources. However, courts have read this protection into Article 19(1)(a) as an essential aspect of press freedom. The rationale is that compelled disclosure chills investigative journalism and undermines democratic accountability.

1. Correct Answer: B – Articles 21 and 22

Explanation: Preventive detention directly affects personal liberty under Article 21. Article 22 provides specific procedural safeguards, such as communication of grounds and representation before an Advisory Board. Together, they form the constitutional framework governing preventive detention.

1. Correct Answer: B – An aspect of personal liberty and dignity

Explanation: In *K.S. Puttaswamy v. Union of India* (2017), a nine-judge bench held that privacy is intrinsic to life and personal liberty under Article 21. It is grounded in dignity, autonomy, and decisional freedom, not merely in informational control.

1. Correct Answer: D – Prohibition of trafficking

Explanation: Article 23 operates horizontally. It binds not only the State but also private individuals, prohibiting trafficking and forced labour. Most Fundamental Rights apply vertically against the State; Article 23 is a notable exception.

1. Correct Answer: C – Lacks deep and pervasive State control

Explanation: Article 12 includes "other authorities" under State control. Courts apply tests such as financial, functional, and administrative dominance. A body lacking deep and pervasive control, even if performing public functions, generally remains outside Article 12.

1. Correct Answer: B – Void to the extent of inconsistency

Explanation: Article 13(2) declares that any law contravening Fundamental Rights is void "to the extent of the contravention." An unreasonable restriction on speech violates Article 19(2) and becomes unconstitutional in that measure.

1. Correct Answer: C – Certiorari

Explanation: Certiorari lies to quash decisions of authorities acting without jurisdiction or in violation of natural justice. Where a mandatory hearing is denied, the order is vitiated and must be annulled—precisely the function of certiorari.

1. Correct Answer: B – Exchange of territories pursuant to international agreement

Explanation: The Ninth Constitutional Amendment, 1960, enabled implementation of the Indo-Pakistan Agreement on the Berubari Union and exchange of enclaves. It followed the Supreme Court's advisory opinion that such territorial cession required a constitutional amendment.

1. Correct Answer: B – M. Nagaraj

Explanation: M. Nagaraj v. Union of India (2006) held that reservation in promotion for SC/STs is permissible only when the State produces quantifiable data proving backwardness, inadequate representation, and preservation of administrative efficiency. It transformed promotional reservation into a conditional, evidence-based policy choice.
