CLAT PG 2027

30 DAY HIGH INTENSITY ROADMAP

1 to 30 November 2026 | Final 5 day sprint: 1 to 5 December | Exam: 6 December 2026

THE GOAL: Complete a fast first pass of every subject, revise high yield doctrines and cases, practise passages and MCQs daily, and enter the exam with a tested time management and error repair system. Aim for 500 total structured case briefs, including work completed before November.

How to use this roadmap

- Treat each daily row as the minimum plan. If you finish early, use the extra time to repair weak areas rather than adding random material.
- Use the same daily loop: learn or revise, active recall, passage based MCQs, structured case briefs, and error log. Passive reading alone does not count as completion.
- This plan compresses the two month roadmap into 30 days. Most foundation days combine multiple topic blocks. Move quickly, mark uncertain concepts, and revisit them during revision.
- Case target: generally 7 to 8 new structured briefs daily, with 8 to 10 on test days. Count earlier case briefs towards the 500 case goal. If your bank is short, prioritise landmark cases from major subjects.
- For every wrong MCQ, record the concept, correct rule, relevant case or statute, and one line explaining the mistake.
- Use CLATatalogue notes, previous year questions, case law updates, and mocks for structured practice.

Official exam anchor

- CLAT PG 2027: 120 questions for 120 marks in 120 minutes. Each correct answer earns 1 mark; each wrong answer attracts a penalty of 0.25 marks.
- Subjects: Constitutional Law, Jurisprudence, Administrative Law, Contract, Torts, Family, Criminal, Property, Company, Public International, Tax, Environmental, and Labour and Industrial Law.
- Exam date: Sunday, 6 December 2026. Recheck the Consortium website for any later official notice.

Daily roadmap | 1 to 30 November

Daily accountability rule: tick each task only after completing it. A case means a structured brief, not a cover to cover judgment. Every study day includes old case recall and an error log update.

Phase 1: Foundation sprint | 1 to 10 November

Fast first pass through every subject. Most days cover two or more topic blocks; mark shaky concepts for later repair.

Mock and PYQ protocol

- Before each mock, warm up for 10 minutes with 5 to 10 legal propositions or cases. Do not do heavy new learning immediately before the test.
- Attempt a full mock as 120 questions in 120 minutes under exam conditions. Record start and finish time, attempted, correct, wrong, skipped, raw score and accuracy.
- Analysis is mandatory. Classify every error as one of five types: knowledge gap, misread, bad elimination, overthinking or time pressure.

- Build a Top 50 Errors list by 20 November and a Final 100 Cases list by 29 November. These become the final revision deck.
- Use CLATatalogue mocks, PYQs and subject wise notes as the practice layer.

Final 5 day sprint | 1 to 5 December 2026

By this stage, the syllabus should be complete. Consolidate what you know, protect accuracy and arrive rested. Avoid a full mock on 5 December.
